Rambler EP

E196

Wing Span	Wing Area	Flying Weight	Fuselage Length
39.5 in / 1000 mm	259 sq in / 16.7 sq dm	22 oz / 620 g	31.5 in / 805 mm

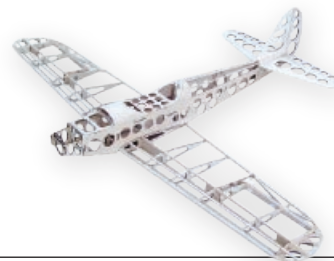

Requires

4-channel radio w/ 4 micro servos,
15A (8 cells) speed controller,
7-8 cells 1000 mAh battery & charger

- Aerobatic park flyer fabricated with top quality balsa / plywood and covered with genuine heat shrink World Models' LightTex covering
- Strong wood structure and tough covering give the airframe the best load to weight ratio and capability for further power upgrades
- Full house controls (ailerons, elevator, rudder and throttle) extend maneuvering limits
- Strong and light pre-painted fiber glass cowling
- Ultralite pilot shown is optional
- Comes with geared speed 400 motor and propeller

COVERINGS CODE NOS.	SGX100	SGX196000

Super Chipmunk - EP

E205

Wing Span	Wing Area	Flying Weight	Fuselage Length
39.5 in / 1000 mm	260 sq in / 16.8 sq dm	25.5 oz / 720 g	32 in / 810 mm

Requires

4-channel radio w/ 4 micro servos,
15A (8 cells) speed controller,
7-8 cells 1000 mAh battery & charger

- Scaled park flyer fabricated with top quality balsa / plywood and covered with genuine heat shrink covering. Strong wood structure and tough covering give the airframe the best load to weight ratio and capability for further power upgrades
- Full house controls (ailerons, elevators, rudder, and throttle) extend maneuvering limits and deliver scale flying
- Fully symmetrical airfoil that enhance aerobatics performance
- Comes with geared speed 400 motor and propeller
- Strong and light pre-painted fiber glass cowling
- All necessary hardware and accessories provided, including the Ultralite pilot which greatly enhance scaled look without weight penalty
