Warning! This model is not a toy. It is designed for maximum performance. Please seek advice if one is not familiar with this kind of electric powered precision model. Operating this model without prior preparation may cause injuries. Remember, safety is the most important thing. Always keep this instruction manual at hand for quick reference.

* Specifications are subject to change without notice.*

THE WINGS MAKER
FACTORY PRE-FABRICATED
ALMOST-READY-TO-FLY (ARF) SERIES
MADE IN CHINA
www.thewingmaker.com

Specifications
- Wing Span: 33 in / 850 mm
- Wing Area: 299 sq in / 19.3 sq dm
- Flying Weight: 24 oz / 680 g
- Fuselage Length: 26.5 in / 675 mm
- Requires: 3-channel “mixing radio” (elevator and aileron) w/ 2 micro servos, 30A (burst 35A) Brushless ESC and 3 cells 11.1V 15C 2100 mAh battery and charger
BEFORE YOU BEGIN

Read through the manual before you begin, so you will have an overall idea of what to do.

Check all parts. If you find any defective or missing parts contact your local dealer. Please DRY FIT and check for defects for all parts that will require CA or Epoxy for final assembly. Any parts you find to be defective after the gluing process may be difficult to remove for warranty replacement. The manufacturer will replace any defective parts, but will not extend to the parts that are good before gluing to defective parts during assembly. Warranty will not cover any parts modified by customer.

Symbols used throughout this instruction manual comprise of the following:

- **Apply epoxy glue.**
- **Apply thread locker**
- **Assemble left and right sides the same way.**
- **Peel off shaded portion covering film.**
- **Drill holes with the specified diameter (here: 3mm).**
- **Pay close attention here!**
- **Apply instant glue (C.A.glue, super glue.)**
- **Must be purchased separately!**
- **Ensure smooth non-binding movement while assembling.**
- **Cut off shaded portion.**
- **Pierce the shaded portion covering film.**
- **Warning!** Do not overlook this symbol!
Parts List

1. MAIN WING -- 1 pair
   WING TIP -- 1 pair
   TRANSPARENT TAPE 30x300mm -- 2 pcs

2. SCREW PA1.7x8mm -- 8 pcs
   SCREW PB2x18mm -- 4 pcs
   SERVO MOUNTING PANEL -- 1 pair
   PLYWOOD 2x36x36mm (For Aileron Servo) -- 2 pcs
   PLYWOOD 3x12x16mm (For Aileron Horn) -- 2 pcs
   STRAPER -- 2 pcs
   CLEVIS -- 2 pcs
   FUEL TUBE d2xD4x4mm -- 4 pcs
   HORN -- 2 sets
   PUSHROD Ø1.4x51mm w/Threads (For Aileron) -- 2 pcs

3. FUSELAGE -- 1 pc.
   CANOPY / BATTERY COVER -- 1 pc.
   WASHER Ø12x0.9mm -- 2 pcs
   MAGNET Ø6x2mm -- 2 pcs
   PLYWOOD 2x44x168mm (For Battery) -- 1 pc.
   DUMMY COWLING -- 1 pc.
   BATTERY TIE 160mm -- 1 pc.

4. VERTICAL FIN -- 1 set

5. PLYWOOD 4x9x35mm (For Ducted Fan) -- 2 pcs
   SCREW PM2.5x12mm -- 2 pcs
   SCREW PM2.5x8mm -- 2 pcs
   WASHER d3x7mm -- 4 pcs
   WASHER Ø12x0.9mm -- 2 pcs
   MAGNET Ø6x2mm -- 2 pcs
   DUCTED FAN COVER -- 1 pc.

6. CARBON FIBER TUBE Ø5x620mm -- 1 pc.

7. SPONGE 10x50x150mm (For Radio Equipment) -- 1 pc.
   DOUBLE-SIDED TAPE 30x35mm -- 1 pc.

8. DECALS:GM032DEC -- 1 set

9. FIELD STAND -- 1 set (not included in kit version)
1 Main Wing

- Bottom View
- Completed

2 Aileron Servo

- PA1.7x8mm Screw
- PB2x18mm Screw

- Ø1mm pilot holes for The Wings Maker horn are pre-drilled. Please look for pin-hole marks at under side of control surfaces.

- Please do not overtighten PB2x18mm screw. Once the screw brings the horn and backplate in contact with the foam, add 1/2 turn will do. Overtightening will damage the foam.

- Please choose either 02L & 02R or 03L & 03R or 04L & 04R that suits your servo.
3 Fuselage

Battery Tie 160mm
Plywood 2x44x168

Dummy Cowling
Magnet Ø6x2mm
Washer Ø12x0.9mm

4 Vertical Fin

Completed
5 Ducted Fan Propulsion Unit with 28/31 Motor

- Make sure rotating motor casing is not in contact with wirings or anything.

1. PM2.5x12mm Screw 2
2. PM2.5x8mm Screw 2
3. d3xD7mm Washer 4

Apply a drop of CA to each notch will hold the intake cone in place, pry the notch with screw driver to remove the cone for impeller or motor replacement.

Optional Parts
- Ducted Fan Propulsion Unit with Motor PL6800010 & Outrunner 28 / 31 KM0283110

- Make sure TWM logo on ducted fan stay on bottom of fuseage.
6 Main Wing

- Bottom View

- Ø5x620 Carbon Fiber Tube
- Aileron Servo Lead

6 Bottom View

6 Completed

7 Battery & ESC

- Install and arrange the equipment as shown in the picture.

- Battery
- Receiver
- 30A Brushless ESC
- Double-Sided tape
- N4 Battery Tie
- ESC Ducted Fan N4 TWM KP0011310

- Front

- GM032PO19940902 P.6
8 Decals

![Bottom View](image)
The field stand can be used as a launching-pad if you are flying on paved runways. Place the DF-032 on the stand, point it into the wind, check your controls and advance the throttle. When the DF-032 gets enough air speed, pull the elevator gently and the DF-032 will fly off the field stand and get airborne gracefully.

If you are flying on grass fields and could not use the field stand as a launching pad, you will need to hand launch the DF-032.

For the first hand launch flight, we recommend having an assistant to hand launch the DF-032 for you. Ask your assistant to hold the DF-032 by the fuselage, pointed into the wind, while you check the correct control surface response. Fully advance the throttle to start the motor and once the ducted fan is at full power, the hand launcher should gently push the plane into the air at a level attitude. Don’t use excessive force as it is not necessary, and don’t throw the model up the sky as it will cause the model to stall before gaining air speed. Make sure the DF-032 is being launched into the wind and be alert to make corrections to keep the model flying straight and level into the wind.

When the DF-032 has gained enough air speed, gently pull the elevator and let the DF-032 climb to a higher safe altitude. Reduce the throttle to slow the DF-032 while maintaining altitude. The DF-032 should fly well about half throttle. You may add power when turning, climbing or doing loops. Learn how the DF-032 behaves and adjust the trims for level flight.

To avoid overheating of ducted fan motor and battery, we recommend you use full power intermittently. This will also give you longer flying time and extend the battery life.
10 Control Throws

Adjust the control throws as shown in the diagram. These throws are good for general flying. You can adjust according to your personal preference.

![Diagram of control throws](image)

- Please note that the mixing function of your radio will add up the control throws of aileron and elevator input. A control throw of 10mm for the aileron or elevator alone will give you up to 20mm throw if you input aileron and elevator throw at the same time.

11 C.G.

The ideal C.G. position is 75mm (2.95 in.) behind the leading edge measured at where the wing meets the fuselage. In order to obtain the C.G. specified, add weight to the fuselage or move the battery position. Check the C.G. before flying.

![Diagram of C.G. position](image)

Warning!

Important Safety Precautions

# First time flyer should never fly by himself / herself. Assistance from experienced flyer is absolutely necessary.
# Pre-flight adjustment must be done before flying, it is very dangerous to fly a badly pre-adjusted aircraft.
# Panther is specially designed to be powered by KM0283110 Outrunner Motor.
# Make sure the air field is spacious, never fly the plane too close to people and never get too close to a running propeller.
# Check and re-tighten up all factory assembled screws, use thread locker if necessary.
Optional Parts

(ACCESSORIES)

Ducted Fan Propulsion Unit without Motor

<table>
<thead>
<tr>
<th>Code No.</th>
